computers & industrial engineering

An International Journal

Editor
Hamed K. Eldin
Industrial Engineering Department
College of Engineering
University of Iowa
Iowa City, IA 52242-1527, U.S.A.

Associate Editor
Yasser A. Hosni
Industrial Engineering and Management Systems
University of Central Florida
P.O. Box 25000
Orlando, FL 32816, U.S.A.

Editorial Advisory Board

William E. Biles
Department of Industrial Engineering
University of Louisville
Louisville, KY 40292, U.S.A.

F. Max Croft
National Aeronautics and Space Administration (NASA)
Marshall Space Flight Center
Alabama, U.S.A.

C. Patrick Koelling
Department of Industrial and Systems Engineering
Virginia Polytechnic and State University
Blacksburg, VA 24061-0118, U.S.A.

Andrew Kusiak
Department of Industrial Engineering
College of Engineering, 4132 EB
University of Iowa
Iowa City, IA 52242, U.S.A.

Jay Liebowitz
School of Government and Business
The George Washington University
Washington, DC 20052, U.S.A.

John W. Nazemetz
School of Industrial Engineering & Management
Oklahoma State University
Stillwater, OK 74074, U.S.A.

Charles M. Parks
Department of Industrial & Systems Engineering
Ohio University, Athens
OH 45701-2979, U.S.A.

G. Allen Pugh
Department of Industrial Engineering Technology
Indiana University–Purdue University
Fort Wayne, IN 46805-1499, U.S.A.

A. Ravindran
Office of the Provost
University of Oklahoma
Norman
OK 73019-0390, U.S.A.

Daniel Teichroew
The University of Michigan
Ann Arbor
MI 48109-2117, U.S.A.

Thomas L. Ward
Department of Industrial Engineering
University of Louisville
Louisville
KY 40292, U.S.A.

International

Hans-Jorg Bullinger
Fraunhofer-Institut IAO
Bibliothek
Stuttgart, Germany

M. Sadek Eid
Département de Génie
Université de Moncton
Moncton, N.B., Canada E1A 3E9

Ibrahim Fawzi
College of Engineering
Cairo University
Giza, Egypt

Mitsuo Gen
Department of Industrial & Systems Engineering
Ashikaga Institute of Technology
Japan

Chang Eun Kim
Department of Industrial Engineering
Myong-Ji University
Korea

Eduardo Oliva-Lopez
Instituto Politecnico Nacional
Iztacalco DF
Mexico

Yang Byung Park
Department of Industrial Engineering
Kyung Hee University
Korea

Muramatsu Rintaro
Department of Industrial Engineering
Waseda University
Tokyo, Japan

N. A. Schofield
Director, CAE
PA Consulting Group
Cambridge Laboratory
Melbourn, England

Weixuan Xu
The Chinese Academy of Sciences
Beijing, China

Publishing Office
Pergamon Press Ltd, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England [*Tel.* Exeter (0392) 51558; *Fax* (0392) 425370].

Subscription and Advertising Offices
North America—Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A. *Rest of the World*—Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, England [*Tel.* Oxford (0865) 794141].

Subscription Rates
Annual institutional subscription rate (1993); £387.00 (US$619.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice.

Back Issues
Back issues of all previously published volumes, in both hard copy and in microform are available direct from Pergamon Press offices.

Second class postage paid at RAHWAY NJ. Postmaster send address corrections to *Computers & Industrial Engineering*, Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

Published 8 issues/annum in 2 volumes (Volume 24 published quarterly in January, April, July and October and Volume 25 as a complete volume of 4 issues published in September).

List of Contents

NUMBER 1

Kun-Jen Chung	1	An economic study of $\bar{X}$-charts with warning limits
D. A. Mitta, T. A. Avitts and **J. W. Foster III**	9	An investigation of user interface designs for an automated part recognition system
Li Lin and **Ravi Sanka**	23	Data structure and process data traversal in a manufacturing cell controller
Roger J. Gagnon and **Chwen Sheu**	33	A mixed integer programming model for acquiring advanced engineering technologies
Bahram Alidaee	53	Schedule of n jobs on two identical machines to minimize weighted mean flow time
Christos P. Koulamas	57	Single-item and multi-item inventory systems with deterministic, continuous, time dependent demand
Sehun Kim and **Minho Rhee**	69	An application of the Lagrangean relaxation method to unit commitment scheduling in a power generation system with pumped-storage units
Ali M. Al-Bahi	81	Spare provisioning policy based on maximization of availability per cost ratio
Joseph C. Chao and **James C. Hershauer**	91	Modeling data communications controls: a computerized decision aid for design and evaluation
Suleyman Tufekci	109	Generalized decision trees: methodology and applications
Reza Ramazani and **Nazar Younis**	125	Repetitive pure flowshop problem: a permutation approach

NUMBER 2

Hamed K. Eldin	i	Message from the Editor
Rajeev Kaula and **Jerry Chin**	131	A database approach towards flexible manufacturing: a conceptual framework
Moncer Hariga	143	The inventory replenishment problem with a linear trend in demand
K. C. Chan and **J. Nhieu**	151	A framework for feature-based applications
Yongbin Yuan, Can A. Dogan and **Gary L. Viegelahn**	165	A flexible simulation model generator

Azim Houshyar and **Bob White**	177	Exact optimal solution for facility layout: deciding which pairs of locations should be adjacent
Kanad Chakraborty and **Utpal Roy**	189	Connectionist models for part-family classifications
Hossein Jamshidi and **Robert A. Brown**	199	Development of production cycles for group technology environment with the Wagner–Whitin Algorithm
Jae-Dong Hong and **Jack C. Hayya**	209	Dynamic lot sizing with setup reduction
H. Brian Hwarng and **Norma Faris Hubele**	219	Back-propagation pattern recognizers for $\bar{X}$ control charts: methodology and performance
Elin M. Wicks and **Thomas O. Boucher**	237	NCIC: a software tool for capital investment analysis in manufacturing
Jun Wang, Jiaqin Yang and **Vidyaranya B. Gargeya**	249	Tool requirement planning in stochastic job shops: a simulated annealing approach
James C. Chen and **Liang Chen**	267	A fast simulator for tandem queueing systems
S. M. Taboun and **S. D. Bhole**	281	A simulator for an Automated Warehousing System
Kun-Jen Chung and **Shieh-Liang Chen**	291	An algorithm for the determination of optimal design parameters of joint $\bar{X}$ and R control charts
Chaweng Changchit and **M. P. Terrell**	303	A multiobjective reservoir operation model with stochastic inflows
Shivakumar Raman and **Ravi Lakkaraju**	315	The effect of tool life and other process variables in NC path planning

NUMBER 3

Rasaratnam Logendran	329	A binary integer programming approach for simultaneous machine-part grouping in cellular manufacturing systems
Cheolhan Kim, Kwangsoo Kim and **Injun Choi**	337	An object-oriented information modeling methodology for manufacturing information systems
M. Hasan Imam and **Mustahsan Mir**	355	Automated layout of facilities of unequal areas
Huan Neng Chiu	367	A cost saving technique for solving capacitated multi-stage lot-sizing problems

David T. Hill, C. Patrick Koelling and Harold A. Kurstedt	379	Developing a set of indicators for measuring information-oriented performance
Odesseus Charalambous and Khalil S. Hindi	391	A knowledge based job-shop scheduling system with controlled backtracking
Cengiz Haksever	401	New evidence on the efficiency of the steepest-edge simplex algorithm
Behnam Bahr and J. T. Huang	413	Microcomputer-based optical sensor for seam tracking robot
Dinesh Shenoy K. and Bikash Bhadury	421	MRSRP—a tool for manpower resources and spares requirements planning
Ali K. Kamrani and Hamid R. Parsaei	431	A group technology based methodology for machine cell formation in a computer integrated manufacturing environment
Hui-Ming Wee	449	Economic production lot size model for deteriorating items with partial back-ordering
Samia Siha	459	A decision model for selecting mutually exclusive alternative technologies
S. A. Hassan and F. M. Rashed	477	Minimizing the cost of riveted joints: a nonlinear programming model
Ravinder Nanda and Ho-Ki Nam	487	Quantity discounts using a joint lot size model under learning effects—multiple buyers case
Utpal Roy and C. R. Liu	495	Integrated CAD frameworks: tolerance representation scheme in a solid model
	I	Announcement

NUMBER 4

INDUSTRIAL ENGINEERING TECHNOLOGY IN JAPAN

Mitsuo Gen	v	Foreword
Hiroshi Ohta and Dong-il Yoo	511	An information-theoretic approach to consumer preference and product planning
Yoshio Sugasawa, Masashi Katsumata and Noboru Takeshita	523	Behavior analysis and performability of a co-operative motion system modeled by Petri Net
Genji Yamazaki, Noriyuki Kobayashi, Yorimasa Kuba and Shigeki Shotaka	531	On the optimal number of machines operated by a single worker

Mitsuo Gen, Kenichi Ida, Yasuhiro Tsujimura and **Chang Eun Kim** 539 Large-scale 0–1 fuzzy goal programming and its application to reliability optimization problem

Tadaaki Fukukawa and **Sung-Chan Hong** 551 The determination of the optimal number of kanbans in a Just-In-Time production system

Tsutomu Nagata, Yoichi Nagata and **Hirokazu Koshimitsu** 561 Building a CIM system for compound plant: utilization of distributed processing system

Harunobu Tateno and **Toshinari Matsui** 571 CIM system for telecommunications equipment

Ryu Katayama, Yuji Kajitani, Kaihei Kuwata and **Yukiteru Nishida** 579 Developing tools and methods for applications incorporating neuro, fuzzy and chaos technology

Bong Jin Lee, Yukio Ono and **Yoonchul Lee** 593 Introduction to FANUC CELL 60 and its application on MAP based large manufacturing FA system for 72 hour continuous unmanned operation: a case study

Djehane E. Hosni and **Toshinori Kobayashi** 607 Japan's labor shortage

I Announcement
